SUMMARY

- Recent Computer Science Engineering graduate with a strong interest in Data Analytics, Business Intelligence, and Web Development.
- Knowledge of SQL, Power BI, Microsoft Excel, and data visualization techniques for transforming raw data into meaningful insights.
- Experience in developing academic and personal projects, including data analytics dashboards and portfolio websites.
- Familiar with data cleaning, data analysis, dashboard creation, and basic web technologies such as HTML, CSS, and JavaScript.
- Strong understanding of analytical thinking, problem-solving, and attention to detail with a passion for learning emerging technologies.
- Actively pursuing certifications and hands-on projects to enhance technical and professional skills in the IT industry.
- Effective team player with good communication skills, adaptability, and eagerness to control to organizational growth as a Data Analyst or IT professional.

TECHNICAL SKILLS

- Programming & Scripting: Python (Basic), Java (Basic)
- Database: SQL, MySQL
- Data Science / AI: Machine Learning (Basic), Deep Learning (Basic – Project Based)
- Data Analytics Tools: Microsoft Excel, Power BI (Learning)
- Web Technologies: HTML, CSS, JavaScript
- Version Control: Git, GitHub
- Development Tools: Visual Studio Code
- AI Tools: ChatGPT, Google Gemini (for learning, coding support, and project guidance)

EXPERIENCE

Intern – Web Development

Pantech ProEd Pvt Ltd | Feb 2025

- Developed responsive web pages using HTML, CSS and JavaScript
- Designed user-friendly UI and implemented form validations
- Improved debugging and problem-solving skills during project work

Intern – Full Stack Development

Jestec ProEd Pvt Ltd | Jun 2025

- Built full stack web applications using HTML, CSS, JavaScript
- Developed backend APIs using Node.js and Express
- Performed CRUD operations with MySQL and MongoDB
- Used Git for version control and project collaboration

Intern – Data Analytics

Approtech R&D Solutions Pvt Ltd | Dec 2025 – Jan 2026

- Performed data cleaning and analysis using Python and Excel

- Created dashboards and visual reports using Power BI
- Applied data visualization techniques for business insights
- Worked on trend analysis and forecasting projects

EDUCATION

Bachelor of Engineering

Computer Science and Engineering

November 2022 – May 2026

CGPA – 7.88

RECENT PROJECT

Project : Fake Job Posting Detection using Deep Learning – (January 2026 – May 2026)

Organization: Academic Project / College Project

Role: Data Science / Deep Learning Developer

Description: Developed a deep learning-based classification system to identify fake job postings using natural language processing techniques to improve online job platform safety and trustworthiness.

Key Responsibilities:

- Performed data preprocessing and text cleaning including handling missing values and applying NLP techniques for feature extraction.
- Built and evaluated deep learning classification models to detect fraudulent job postings using performance metrics such as accuracy, precision, recall, and F1-score.

Technologies Used:

Python, Deep Learning, Natural Language Processing (NLP), TensorFlow / Keras , Pandas, NumPy

Achievements:

- Participated in an International Conference and received a certificate of participation.
- Successfully completed an academic project on Fake Job Posting Detection using Deep Learning.
